Skin Care, Laser

Specialized Certificate Programs

Body Contouring & Skin Tightening

Gain a thorough understanding of body contouring and skin tightening using radiofrequency and EMS technology — one of the most sought-after treatments in the medical aesthetics industry. This one-day course covers both theory and hands-on practice. Students are encouraged to bring their own models.

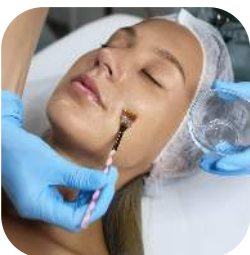

Body Treatments

Expand your skincare repertoire by learning full-body treatments, hot stone massage, aromatherapy, and Swedish massage techniques.

Brow Technician

Master brow shaping methods such as waxing, tweezing, trimming, tinting, and brow lamination to create perfectly styled brows for every client.

Chemical Peels

Learn this skin-resurfacing procedure that removes the outer layer of skin, allowing a smoother, younger-looking layer to emerge. Chemical peels can treat acne, acne scarring, fine lines, wrinkles, uneven skin tone, and dryness. Training includes peels of varying intensities using Dermo28's professional skincare line.

Dermaplaning

This exfoliation technique removes fine vellus hair and dead skin cells for smoother skin. Learn to perform the treatment using a handheld blade, consult clients on suitable treatment combinations, and adapt the service for various skin types.

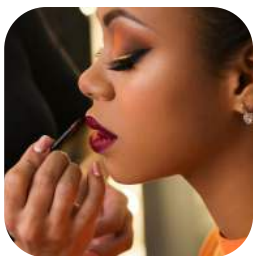

Hydradermabrasion

Learn an advanced, medical-grade resurfacing treatment that clears pores and hydrates the skin using multiple technologies and handpieces. Benefits include skin hydration, brightness, plumping, and a clearer complexion. Suitable for all ages and skin concerns.

Introduction to Botox and Dermal Fillers

Embark on a comprehensive journey into the world of injectable treatments through our course, where you will gain a solid theoretical foundation.

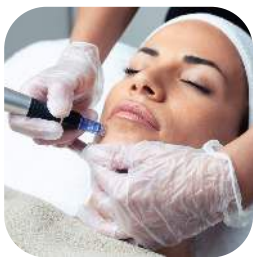

Make-Up Artistry

Enter the beauty and bridal market with skills in trending makeup techniques, including highlighting, contouring, cut crease, smokey eye, ombré brows, and more. Perfect for launching a freelance career.

Microdermabrasion

Master this minimally invasive procedure for improving skin texture and tone using a device with an abrasive surface to exfoliate the outer skin layer. Emphasis is placed on hands-on practice with peers and clients.

Microneedling

Learn to perform microneedling consultations and treatments for various skin concerns. Training includes treatment indications and contraindications, selecting the correct needle depth, and post-treatment care.

NAIL PROGRAMS

Advanced Nail Technician

Learn spa manicures and pedicures, shellac, gel nails, nail art, acrylic shaping, sculpting, French tips, and ombré. Graduate with the skills and tools to start your own nail business or begin working right away.

Artificial Nail Enhancements

Learn the latest nail trends, including gel and acrylic applications. Techniques include French tips, nail design, and ombré. Designed for nail technicians with previous certification or experience.

Gel Nails

Master safe, current application techniques for artificial nail enhancements. Training includes gel overlays, building nail forms, and applying nail tips, along with nail art and design.

Manicures and Pedicures

Learn proper treatment protocols and sterilization methods in line with current spa industry standards. Training covers classic polish, French polish, shellac application, and paraffin treatments.

Nail Technician

Gain expertise in all aspects of nail care, including manicures, pedicures, shellac, gel nail applications, extensions, and nail art.

Skin Care

Learn to assess and treat a variety of skin concerns using medical-grade and cosmeceutical products. Training covers consultations, facials, and advanced facial treatments, including the use of Dermo28's professional skincare line.

Waxing Hair Removal

Learn full-body waxing techniques with a focus on precision, especially in brow shaping and Brazilian waxing. Includes in-depth theory and hands-on practice to master the art of flawless waxing.
